## **No-tools tripod bolts are now available for the Celestron NexStar series.**

These replace the factory Allen bolts so the telescope can be attached to the tripod without tools. The 5-point knobs are about 2.1 inches in diameter and have a non-slip surface for a secure grip. These will mount the Starizona Landing Pad without modification.

**Price is \$29.95 per set, including shipping.** They can be ordered by sending us a check or money order to the above address, or by credit card through our website at [www.bobsknobs.com](http://www.bobsknobs.com).

Now you can leave another Allen wrench inside!
